

Puja Kumari

Data Analyst · MIS Executive · Reporting & Analytics

+91-8084196850 | pujasharma2520@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Bangalore, India

Professional Summary

Results-driven Data Analyst with strong proficiency in **SQL, Python, Power BI, and Advanced Excel**, with **7** end-to-end analytics projects spanning **1M+** row datasets, automated reporting pipelines, and interactive dashboards. Skilled in transforming raw data from multiple sources into KPI-driven insights that support operational and business decisions. Experienced in MIS reporting, data validation, stakeholder communication, and cross-functional collaboration. Currently delivering data-backed process improvements at Sagility across **7+** insurance systems and seeking to grow further in a data analyst or reporting role.

Technical Skills

SQL & Databases: PostgreSQL, SQLite — complex joins, CTEs, window functions, subqueries, query optimisation, data modelling, EXPLAIN ANALYZE, large-scale datasets (1M+ rows)

Python & Analytics: Pandas, NumPy, Matplotlib, Seaborn — EDA, correlation analysis, rolling window calculations, trend & pattern identification, predictive modelling, exception handling, automation scripting

Power BI & Dashboards: DAX, Power Query (ETL), Interactive Dashboards, KPI tracking, drill-down slicers, data visualisation, automated refresh workflows

Advanced Excel & MIS: Pivot Tables, VLOOKUP, HLOOKUP, INDEX-MATCH, Advanced Formulas, Conditional Formatting, Data Validation, Power Pivot, VBA & Macros, report automation, MIS reporting

Automation & ETL: Excel VBA, Outlook email automation, Windows Task Scheduler, Power Query refresh, data pipeline scheduling, ETL workflows, process automation

Statistics & Analytics: Correlation analysis, trend forecasting, hypothesis-driven analysis, A/B testing support, business modelling, metric definitions, KPI tracking

Tools & Others: Jupyter Notebook, Google Colab, pgAdmin, Git, GitHub, Google Sheets, MS Office Suite

Data Analytics Projects

Apple Retail Sales Analysis

[GitHub](#)

Skills: SQL, PostgreSQL, Python (Pandas), Data Modelling, Query Optimisation

- Wrote **20+** advanced SQL queries (CTEs, window functions, complex joins) across **5** normalised tables in PostgreSQL; created targeted indexes validated with EXPLAIN ANALYZE to optimise query performance on **1M+** rows.
- Used Python (Pandas) to further analyse SQL-extracted data — revealed that **75%+** of lifetime units (**4.23M+**) sell post-18-month launch window, and Accessories carry a disproportionate warranty claim rate (**783** claims vs **26,797** sales).
- Translated findings into structured business recommendations to inform post-launch inventory planning and aftersales strategy decisions.

E-commerce Sales Dashboard

[GitHub](#)

Skills: Power BI, Power Query (ETL), DAX, Data Modelling, Dashboard Design

- Designed a Power BI data model connecting **2** source tables via Power Query ETL with **10+** DAX measures; surfaced **438K** in sales, **37K** profit, and **5,615** units across **3** product categories and **5** regions.
- Implemented **6+** slicers with quarter and state drill-down, revealing COD as the dominant payment mode (**44%**) and Printers as the top profit sub-category — enabling self-service reporting for non-technical stakeholders.
- Automated data refresh workflows, eliminating **2–3 hours** of weekly manual reporting effort and enabling leadership to access real-time business KPIs independently.

Hotel Booking Cancellation Analysis

GitHub

Skills: Python, Pandas, NumPy, Matplotlib, Seaborn, Statistical Analysis, EDA

- Processed **119,000+** booking records using Pandas; applied rolling window calculations and descriptive statistics segmented by market type, lead time, and hotel category — surfacing a **37%** overall cancellation rate (City Hotel **42%** vs Resort **28%**).
- Applied correlation analysis between ADR and cancellation risk; established Group bookings cancel at **62%** and advance bookings over **160** days at **55%+** — producing 3 actionable pricing signals with full exception handling throughout the pipeline.
- Delivered data-driven recommendations to support dynamic pricing strategy and reduce revenue leakage across booking segments.

Daily Invoice Report Automation

GitHub

Skills: Excel VBA, Macros, Power Query, Power Pivot, Outlook Automation, Windows Task Scheduler

- Built an end-to-end automated MIS reporting system using Excel VBA and Macros; integrated multiple CSV data sources into a Power Pivot data model with automated refresh of Power Query and Pivot Tables — zero manual effort.
- Implemented Outlook email automation with dynamic recipient handling and Windows Task Scheduler for fully unattended daily execution; resolved real-world challenges including OneDrive file locks and async refresh timing.
- Reduced daily reporting time from **2 hours to 5 minutes**; documented the end-to-end workflow establishing a reliable, auditable, and repeatable reporting process.

Hospital Emergency Room Dashboard

GitHub

Skills: MS Excel, Power Query, Power Pivot, DAX, Advanced Formulas, Data Validation

- Built and maintained an interactive operational dashboard in Excel using Power Query, Power Pivot, advanced formulas, data validation, and DAX; tracked **5 KPIs** (patient volume, wait time, satisfaction score, admission rate, timeliness) across **9** referral departments.
- Delivered age, gender, and month slicers for self-serve reporting; documented the reporting methodology end-to-end — removing analyst dependency for routine performance monitoring.
- Ensured full data accuracy and consistency through rigorous validation checks; workbook optimised for performance across multi-year ER datasets.

Airline Revenue & Occupancy Optimisation

GitHub

Skills: Python, SQL, SQLite, Pandas, NumPy, Matplotlib, Seaborn

- Extracted and analysed a **7-table** SQLite database using Python (Pandas, NumPy) and SQL to evaluate seat occupancy, fare class pricing, and revenue across aircraft types; produced **8+** visualisations (Matplotlib, Seaborn).
- Identified Business fares at **3x** Economy rates and SU9 as the highest revenue generator; modelled a **10%** occupancy increase scenario projecting proportional revenue growth to guide route optimisation and fleet allocation decisions.

Work Experience

Process Consultant

Aug 2025 – Present

Sagility, Bangalore

- Collected, cleaned, and organised denial and billing data across **7+** insurance systems; analysed data to identify patterns, trends, and anomalies — surfacing actionable process improvement opportunities to support strategic decision-making at scale.
- Developed and maintained reports to monitor KPIs across **50+** daily claim cases with high accuracy; assisted in improving data collection systems to enhance data quality, consistency, and accessibility across the reporting pipeline.
- Collaborated with cross-functional teams to understand data needs; presented findings and recommendations clearly to **100+** healthcare stakeholders — accelerating payment reconciliation cycles and contributing to operational improvements.

OByZero, Bangalore

- Collected and organised inventory datasets across Excel and Google Sheets; analysed data to identify sales trends contributing to **250+** units sold within a single campaign — directly informing restocking and promotional decisions.
- Reconciled product listings across **2** platforms (Shopify and Flipkart) ensuring **100%** data accuracy and reducing pricing and stock discrepancies.

Certifications & Achievements

HackerRank SQL (Advanced)

Skills demonstrated: Complex SQL queries, CTEs, window functions, multi-table joins, subqueries, query optimisation, large dataset analysis in relational databases.

LeetCode SQL 50 Badge

Skills demonstrated: Solved 50 curated SQL problems covering joins, aggregations, subqueries, window functions, and real-world data scenarios.

InterviewBit SQL (100%)

Skills demonstrated: Complete SQL mastery across data extraction, filtering, grouping, joins, and advanced query techniques — 100% score across all modules.

Python for Data Analysis

Skills demonstrated: Python programming, Pandas, NumPy, Matplotlib, Seaborn, EDA, data cleaning and transformation, trend analysis, visualisation, and automation scripting.

Microsoft Excel: Beginner to Expert (Udemy)

Skills demonstrated: Advanced Excel functions (VLOOKUP, HLOOKUP, INDEX-MATCH), Pivot Tables, data validation, conditional formatting, charts, and Excel-based data analysis.

Advanced Excel Data Visualisation (Udemy)

Skills demonstrated: Dashboard design in Excel, dynamic charts, Power Query, data storytelling, interactive visualisations, and reporting best practices.

Microsoft Power BI Data Analytics

Skills demonstrated: Power BI dashboard development, DAX measures and calculations, Power Query ETL, data modelling, KPI tracking, and business intelligence reporting.

Education

Indira Gandhi National Open University · MA — English Language and Literature · 2021 – Present (Exp. 2026)

Magadh University, India · BA — English Language and Literature · 2019
